AB Described is a novel imidazole-silane compd. which has an excellent heat resistance and a high corrosion preventive effect on a metal surface and is capable of remarkably improving the adhesion of a metal to a resin substrate, a process for prep. of same compd., and a new metal surface finishing agent comprising the same. The novel imidazole-silane compd. is produced by reacting an imidazole compd. with a 3-glycidoxypropylsilane compd. at 80 to 200.degree.. The surface finishing agents are used for copper foils for laminates for printed circuits.
